

DIRECTIONS for questions 1 to 5: Answer these questions on the basis of the information given below.

Five persons, Abhinav, Jai, Kiran, Pavan and Tarun, go for walking on some days of the week. The distance that any of the five persons walks on any day, if he goes for walking on that day, is an integral multiple of 1 km.

It is known that

- on any day that both Abhinav and Jai go for a walk, Abhinav walks for 1 km more than Jai.
- on any day that both Jai and Kiran go for a walk, Jai walks for 2 km more than Kiran.
- on any day that both Kiran and Pavan go for a walk, Pavan walks for 3 km more than Kiran.
- on any day that both Pavan and Tarun go for a walk, Pavan walks for 6 km more than Tarun.
- on any day that both Abhinav and Tarun go for a walk, Tarun walks 5 km more than Abhinav.

During a period of ten days, from Day 1 through Day 10, on each day, at least four persons went for a walk. The following graph provides, for each day, the sum of the distances walked by all the persons who went for a walk on that day:

Q1. DIRECTIONS *for question 1:* Type in your answer in the input box provided below the question.

What is the total distance (in km) that Abhinav walked across the ten days?

Q2. DIRECTIONS *for questions 2 to 4:* Select the correct alternative from the given choices.

Who among the following went for a walk for the maximum number of days during the given period?

- ☐ a) Abhinav
- ☐ b) Kiran
- ☒ c) **Jai** ✓ **Your answer is correct**
- ☐ d) **Pavan**

Q3. DIRECTIONS *for questions 2 to 4:* Select the correct alternative from the given choices.

What is the difference between the total distance that Jai walked and the total distance that Tarun walked during the ten days?

- ☐ a) 6 km
- ☐ b) 18 km
- ☐ c) **14 km**
- ☐ d) **20 km**

Q4. DIRECTIONS *for questions 2 to 4:* Select the correct alternative from the given choices.

What is the maximum number of consecutive days that Pavan went for a walk during the given period?

☐ a) 8

☐ b) 6

☐ c) 5

☐ d) 3

Q5. DIRECTIONS *for question 5:* Type in your answer in the input box provided below the question.

What is the maximum total distance (in km) that any person walked during the given period?

DIRECTIONS for questions 6 to 10: Answer these questions on the basis of the information given below.

In a cricket tournament, five teams are scheduled to play against each other, such that each team plays against every other team exactly once. In each match, the team that scores more runs wins the match. In any match, if both the teams score the same number of runs, the match is declared to be a tie. However, after the completion of five matches, the tournament was postponed. In these five matches, exactly one team played three matches, while exactly one team played one match.

The following table provides, for each team, the total number of runs scored by (Runs For) and the total number of runs scored against (Runs Against) that team, in all the matches that the team played:

Team	Runs For	Runs Against
A	389	407
B	381	399
C	271	263
D	267	284
E	284	239

It is also known that

- among the teams that played exactly two matches, exactly one team scored the same number of runs in both the matches that it played.
- among the teams that played exactly two matches, for exactly one team, both the teams that played against it scored the same number of runs.
- no team scored more than 280 in any match and no team scored less than 100 in any match.
- the team that played three matches won more than one match.

Q6. DIRECTIONS *for questions 6 and 7:* Select the correct alternative from the given choices.

Which of the following best describes the number of runs that D scored in each of the matches that it played?

- ☐ a) In each match, the number of runs scored by D is between 130 and 140.
- ☐ b) In each match, the number of runs scored by D is between 120 and 130.
- ☐ c) **In each match, the number of runs scored by D is between 130 and 150.**
- ☐ d) In each match, the number of runs scored by D is between 115 and 150.

Q7. DIRECTIONS *for questions 6 and 7:* Select the correct alternative from the given choices.

For which team(s) is the number of matches that it won as a percentage of the total number of matches that it played the highest?

- ☐ a) C
- ☐ b) E
- ☐ c) **Both C and E**
- ☐ d) **B, C and E**

Q8. DIRECTIONS *for questions 8 and 9:* Type in your answer in the input box provided below the question.

Among the teams that played exactly two matches, what is the lowest score made by any team in a match?

Q9. DIRECTIONS *for questions 8 and 9:* Type in your answer in the input box provided below the question.

The tournament was subsequently rescheduled, and all the remaining matches in the tournament were played. At the end of the tournament, at least one of the matches that C played resulted in a tie, and for each team, the total runs scored by that team in the tournament were the same as the total runs scored against that team.

In all the matches that A played after the rescheduling, what is the difference between the runs scored by A and that scored by the opposite teams?

Q10. DIRECTIONS *for question 10:* Select the correct alternative from the given choices.

The tournament was subsequently rescheduled, and all the remaining matches in the tournament were played. At the end of the tournament, at least one of the matches that C played resulted in a tie, and for each team, the total runs scored by that team in the tournament were the same as the total runs scored against that team.

In the match between A and D, what is the difference between the runs scored by the two teams?

- ☐ a) 17
- ☐ b) Either 17 or 27
- ☐ c) **Either 27 or 18**
- ☐ d) **17 or 18 or 27**

DIRECTIONS for questions 11 to 15: Answer these questions on the basis of the information given below.

Exactly seven candidates – John, Harry, Andy, Bob, Will, Tom and Ben – were waiting in a hall for their job interviews at a certain company. Before the interviews started, the seven candidates were seated in seven chairs placed next to each other, all facing the same direction. Jack was conducting the interviews of the seven candidates, one at a time, in an adjacent room. As soon as any candidate's interview was finished, the candidate left the premises immediately and the chair that he had sat in was removed from the hall by an attendant. Jack called each candidate for his interview in a specific order: he first interviewed the candidate sitting at the extreme right, and after the interview of that candidate was done, he interviewed the candidate sitting at the extreme left, and then he interviewed the candidate who was now sitting at the extreme right and so on, until the last candidate was called for the interview.

The following information is known about the order in which the candidates were seated in the hall and the order in which they were called for their interviews:

- i. John, who was interviewed before Bob, was not sitting at either of the extreme ends before the interviews started but was sitting at an extreme end sometime after Andy's interview.
- ii. Tom was interviewed before Will and the number of candidates interviewed after Tom but before Will is the same as the number of candidates who were sitting between Tom and Will before the interviews started.
- iii. The last candidate to be interviewed was sitting adjacent to Ben before the interviews started, while Harry, who was not the first to be interviewed, was not sitting adjacent to Bob before the interviews started.

Q11. DIRECTIONS for questions 11 to 15: Select the correct alternative from the given choices.

How many persons were sitting between Harry and Bob before the interviews started?

- ☐ a) 1
- ☐ b) 2
- ☐ c) 3
- ☐ d) 4

Q12. DIRECTIONS *for questions 11 to 15:* Select the correct alternative from the given choices.

Who was sitting to the immediate left of the person interviewed immediately before Ben?

- ☐ a) Harry
- ☐ b) John
- ☐ c) **Andy**
- ☐ d) **Cannot be determined**

Q13. DIRECTIONS *for questions 11 to 15:* Select the correct alternative from the given choices.
Who was interviewed immediately before the person sitting to the immediate right of John?

- ☐ a) Ben
- ☐ b) Will
- ☐ c) **Bob**
- ☐ d) **None of the above**

Q14. DIRECTIONS *for questions 11 to 15:* Select the correct alternative from the given choices.

Which of the following pairs of candidates were sitting adjacent each other before the interviews started and were interviewed one immediately after the other?

- ☐ a) Bob, Tom
- ☐ b) Ben, Will
- ☐ c) **Will, Tom**
- ☐ d) **Will, Bob**

Q15. DIRECTIONS *for questions 11 to 15:* Select the correct alternative from the given choices.

Who was the last person to be interviewed?

- ☐ a) Will
- ☐ b) Tom
- ☐ c) **Bob**
- ☐ d) **Cannot be determined**

DIRECTIONS *for questions 16 to 20:* Answer these questions on the basis of the information given below.

N is a five-digit number with five distinct digits, such that no two digits of N differ by exactly 2. The first digit of N refers to the left-most digit, while the fifth digit of N refers to the right-most digit. The first digit of N is not 0.

Q16. DIRECTIONS *for question 16:* Select the correct alternative from the given choices.

If the second digit of N is five more than the first digit and three less than the fourth digit, how many possibilities exist for N?

☐ a) 3

☐ b) 4

☐ c) 5

☐ d) 6

DIRECTIONS *for questions 16 to 20:* Answer these questions on the basis of the information given below.

N is a five-digit number with five distinct digits, such that no two digits of N differ by exactly 2. The first digit of N refers to the left-most digit, while the fifth digit of N refers to the right-most digit. The first digit of N is not 0.

Q17. DIRECTIONS *for question 17:* Type in your answer in the input box provided below the question.

What is the difference between the minimum possible value of N and the maximum possible value of N?

Q18. DIRECTIONS *for question 18:* Select the correct alternative from the given choices.

If the digit 0 is not in N , which of the following digits will always be in N ?

- ☐ a) 4
- ☐ b) 5
- ☐ c) 6
- ☐ d) **None of the above**

Q19. DIRECTIONS *for question 19:* Type in your answer in the input box provided below the question.

If the digit 5 is not in N , what is the minimum possible value of N ?

Q20. DIRECTIONS *for question 20:* Select the correct alternative from the given choices.

If the digits 1 and 4 are not in N, how many possibilities exist for N?

☐ a) 0

☐ b) 1

☐ c) 2

☐ d) 3
