

DIRECTIONS *for questions 1 to 5:* Answer these questions on the basis of the information given below.

Eight persons, A through H, are from three different countries, India, China and Sri Lanka, such that each person is from exactly one country and not more than three persons are from the same country. Further, the eight persons work in three different companies, Dell, HP and Microsoft, such that each person works in exactly one company and not more than three persons work in the same company. Also, the eight persons play a different sport among Tennis, Cricket and Football, such that each person plays exactly one sport and not more than three persons play the same sport.

The salary (in USD '000) of each person is distinct and is an integral multiple of 10. The salaries (in USD '000) of A, C, D, F, G and H are 230, 320, 110, 50, 140 and 200, respectively.

It is also known that

i. the averages (in USD '000) of the salaries of the persons who play Tennis, Cricket and Football are 190, 125 and 160, respectively.

ii. the averages (in USD '000) of the salaries of the persons who are from India, China and Sri Lanka are 220, 170 and 65, respectively.

iii. the averages (in USD '000) of the salaries of the persons who work in Dell, HP, and Microsoft are 155, 160 and 170, respectively.

iv. B, who earns more than E, plays Tennis and works in Dell.

v. two persons who work in Microsoft are from the same country, while two persons who play Cricket work in the same company.

Q1. DIRECTIONS *for question 1:* Type in your answer in the input box provided below the question.

What is the salary (in USD '000) of B?

Q2. DIRECTIONS *for question 2:* Select the correct alternative from the given choices.

What BEST can be said about the company in which F works?

- ☐ a) Dell
- ☐ b) **Microsoft**
- ☐ c) **HP**
- ☐ d) **Either HP or Microsoft**

Q3. DIRECTIONS *for question 3:* Type in your answer in the input box provided below the question.

What is the total salary (in USD '000) of all the persons from India who play Football?

Q4. DIRECTIONS *for questions 4 and 5:* Select the correct alternative from the given choices.

For how many countries can it be said that, among the eight persons, each person from that country plays a different sport?

☐ a) 3

☐ b) 2

☐ c) 1

☐ d) 0

Q5. DIRECTIONS *for questions 4 and 5:* Select the correct alternative from the given choices.

Who among the following works in Microsoft and plays Football?

☐ a) A

☐ b) **D**

☐ c) **C**

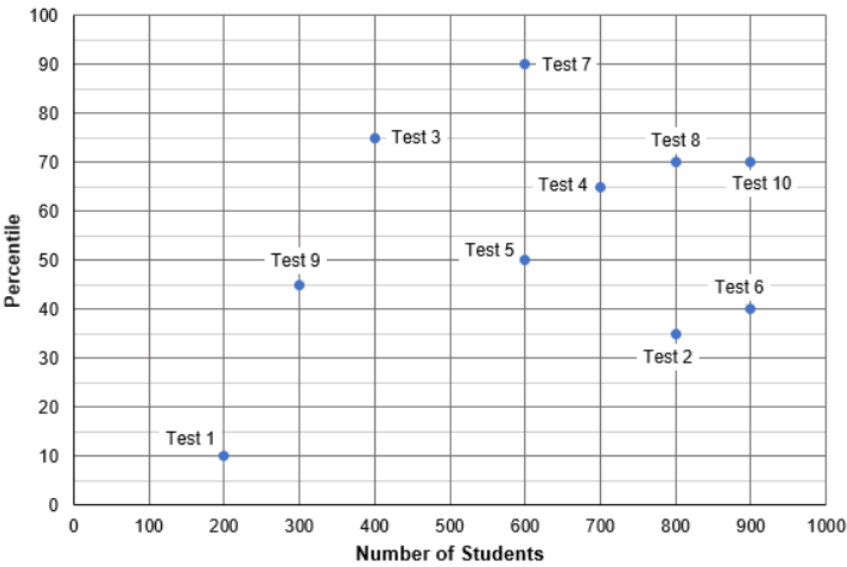

☐ d) **G**

DIRECTIONS for questions 6 to 10: Answer these questions on the basis of the information given below.

Ravi attempted ten tests, Test 1 through Test 10, as part of his preparation for an aptitude exam. In each test, the percentile that Ravi obtained in the test is calculated as 100 times the number of students who scored less than Ravi in that test as a proportion of the total number of students who attempted that test. The percentile that Ravi obtained in any test was a multiple of 5 and no two students received the same score in any test.

At the end of each test, all the students who attempted the test were given ranks starting from 1 in the descending order of their scores in the test.

The following graph provides, for each of the ten tests, the percentile that Ravi obtained in that test (along the vertical axis) and the total number of students who attempted that test (along the horizontal axis):

Q6. DIRECTIONS for question 6: Type in your answer in the input box provided below the question.

What is the minimum number of students who scored better than Ravi in any of the ten tests?

Q7. DIRECTIONS *for questions 7 and 8:* Select the correct alternative from the given choices.

In how many tests was Ravi's rank less (i.e., numerically lower) than 250?

- ☐ a) 7
- ☒ b) 4 **✗ Your answer is incorrect**
- ☐ c) 5
- ☐ d) 6

Q8. DIRECTIONS *for questions 7 and 8:* Select the correct alternative from the given choices.

Ravi ranked the ten tests (from rank 1 to rank 10) in the ascending order of the numerical value of the ranks that he obtained in the ten tests.

Which test would Ravi have ranked fourth?

- ☐ a) Test 9
- ☐ b) **Test 10**
- ☒ c) **Test 1** **✓ Your answer is correct**
- ☐ d) **Test 8**

Q9. DIRECTIONS *for question 9:* Type in your answer in the input box provided below the question.

Ravi ranked the ten tests (from rank 1 to rank 10) in the ascending order of the numerical value of the ranks that he obtained in the ten tests.

In the test that Ravi ranked sixth, how many students scored better than him?

Q10. DIRECTIONS *for question 10:* Select the correct alternative from the given choices.

If the total number of students who wrote at least one of the ten tests is exactly 900, what is the minimum possible number of students who scored more than Ravi in both Test 2 and Test 6?

- ☐ a) 158
- ☒ b) 519 **✗ Your answer is incorrect**
- ☐ c) 439
- ☐ d) 159

DIRECTIONS for questions 11 to 15: Answer these questions on the basis of the information given below.

Five cities, Ahmedabad, Bangalore, Kolkata, Indore and Lucknow, were ranked in three parameters – Cleanliness (C), Infrastructure (I) and Safety (S). The five cities were ranked in each parameter from 1 to 5, such that a numerically lower rank is considered better than a numerically higher rank. Further, for the five cities, the sum of the ranks received by each city in the three parameters was the same and no two cities received the same rank in any parameter.

It is also known that

- i. Ahmedabad received a better rank in I than Indore did, while Kolkata did not receive the fifth rank in S.
- ii. Bangalore received the same rank in C as Lucknow did in S, while Indore was not ranked last in I.
- iii. Kolkata and Indore are the only cities to have received the same rank in exactly two parameters, while Ahmedabad was not ranked last in any parameter.
- iv. Ahmedabad received the same rank in I as Bangalore did in C.

Q11. DIRECTIONS for question 11 to 15: Select the correct alternative from the given choices.

Which of the following BEST represents the rank of Ahmedabad in Safety?

- ☐ a) 4
- ☐ b) 2
- ☐ c) 2 or 4
- ☐ d) 3

Q12. DIRECTIONS *for question 11 to 15:* Select the correct alternative from the given choices.

How many cities were ranked better than Lucknow in both Infrastructure and Safety?

☐ a) 0

☐ b) 1

☐ c) 2

☐ d) 3

Q13. DIRECTIONS *for question 11 to 15:* Select the correct alternative from the given choices.

The rank of Kolkata in Cleanliness is the same as the rank of

- ☐ a) Ahmedabad in Infrastructure
- ☐ b) **Lucknow in Safety**
- ☐ c) **Bangalore in Safety**
- ☐ d) **Indore in Infrastructure**

Q14. DIRECTIONS *for question 11 to 15:* Select the correct alternative from the given choices.

Which city was ranked first in Safety?

- ☐ a) Bangalore
- ☐ b) **Kolkata**
- ☐ c) **Lucknow**
- ☐ d) **Indore**

Q15. DIRECTIONS *for question 11 to 15:* Select the correct alternative from the given choices.

How many pairs of cities exist such that one city is ranked better in at least two parameters than the other?

☐ a) 10

☐ b) 9

☐ c) 8

☐ d) 7

DIRECTIONS for questions 16 to 20: Answer these questions on the basis of the information given below.

Four teams, A through D, played against each other in a school-level football tournament, in which each team played against each of the other teams exactly once. None of the matches of the tournament ended as a draw.

In order to make the matches more interesting to watch, the points for any match in the tournament were awarded in the following manner: In any match, the number of points awarded to the winner of the match was the sum of the goals scored by the two teams in the match, while the number of points awarded to the loser of the match was the difference of the goals scored by the two teams in the match.

The following table provides the number of Goals For (i.e., scored by) and Goals Against each team and the total points scored by each team at the end of the tournament:

Team	Goals For	Goals Against	Total Points
A	10	5	7
B	6	3	9
C	7	11	14
D	4	8	12

It is also known that

- i. no team won all the matches that it played in the tournament.
- ii. the only match that D won was against C, while A scored 4 goals in the match against D.

Q16. DIRECTIONS for question 16: Select the correct alternative from the given choices.

What BEST can be said about the number of goals that C scored against A?

- ☐ a) It is either 4 or 5.
- ☐ b) It is either 3 or 4.
- ☐ c) It is exactly 5.
- ☐ d) It is exactly 4.

Q17. DIRECTIONS *for questions 17 and 18:* Type in your answer in the input box provided below the question.

How many points were B and C awarded in total in the match that they played against each other?

Q18. DIRECTIONS *for questions 17 and 18:* Type in your answer in the input box provided below the question.

How many goals did B score against D?

Q19. DIRECTIONS *for questions 19 and 20:* Select the correct alternative from the given choices.

How many points were awarded to A in the match that it played against D?

☐ a) 5

☐ b) 4

☐ c) 6

☐ d) 7

Q20. DIRECTIONS *for questions 19 and 20:* Select the correct alternative from the given choices.

What is the maximum number of goals scored in any match?

☐ a) 5

☐ b) 6

☐ c) 8

☐ d) 9
