

DIRECTIONS *for questions 1 to 5:* Answer these questions on the basis of the information given below.

Three ferries, Ferry 1, Ferry 2 and Ferry 3, provide transportation between two cities, Jarpur and Harpur, which are located on opposite banks of a river. Each ferry can carry a different number of passengers in a single trip, i.e., from one city to the other. Ferry 1 can carry up to five passengers in a single trip, Ferry 2 can carry up to seven passengers in a single trip and Ferry 3 can carry up to nine passengers in a single trip. Further, no ferry will make a trip without at least one passenger.

If any passenger arriving at a bank can travel by more than one ferry, he or she will choose the lowest numbered ferry available at the bank. Any ferry travelling from one bank to another is counted as one trip.

At the beginning of a day, all the three ferries were located in Jarpur. During the course of the day, the three ferries made a total of ten trips, which are sequentially labelled Trip 1, Trip 2, Trip 3 and so on till Trip 10 (irrespective of the exact ferry that made the trip), in the order in which the trips started. For any two consecutive trips, the second trip started only after the first was completed. It is known that at the end of Trip 10, all the ferries were in the same city. The following table provides information about the number of persons who travelled in each trip:

Trip	Number of Persons
Trip 1	5
Trip 2	7
Trip 3	8
Trip 4	6
Trip 5	6
Trip 6	7
Trip 7	5
Trip 8	9
Trip 9	7
Trip 10	8

Q1. DIRECTIONS *for question 1:* Select the correct alternative from the given choices.

Which ferry made Trip 7?

- ☐ a) Ferry 1
- ☐ b) Ferry 2
- ☐ c) Ferry 3
- ☐ d) Cannot be determined

Q2. DIRECTIONS *for question 2:* Type in your answer in the input box provided below the question.

What is the maximum number of trips made by any ferry?

Q3. DIRECTIONS *for question 3:* Select the correct alternative from the given choices.

Which of the following trips were from Jarpur to Harpur?

- ☐ a) **Trip 7**
- ☐ b) **Trip 9**
- ☐ c) **Trip 8**
- ☐ d) **More than one of the above**

Q4. DIRECTIONS *for question 4:* Type in your answer in the input box provided below the question.

What is the difference between the total number of persons who travelled from Jarpur to Harpur and that of those who travelled from Harpur to Jarpur?

Q5. DIRECTIONS *for question 5:* Select the correct alternative from the given choices.

After which of the following trips were at least two ferries in Harpur?

- ☐ a) **Trip 5**
- ☐ b) **Trip 7**
- ☐ c) **Trip 6**
- ☐ d) **None of the above**

DIRECTIONS *for questions 6 to 10:* Answer these questions on the basis of the information given below.

Five secret agents are required to use fake names when introducing themselves to anyone. The names that are approved for their use are James, Jeeves, Jack, Julian and Joss. The five agents met each other on a certain day and met only in pairs. They introduced themselves to each other using only the approved names. It is also known that each agent used a different name when introducing himself to the other four agents. Further, any pair of agents did not use the same name for introducing themselves to each other.

Exactly one agent did not use the name Jeeves when introducing himself to the other four agents; each of two agents did not use the name Joss when introducing himself to the other four agents; one agent did not use the name James when introducing himself to the other four agents; one agent did not use the name Julian when introducing himself to the other four agents.

It is also known that

- i. the agent who did not use the name James introduced himself as Jack to the agent who did not use the name Julian.
- ii. for exactly one of the agents, exactly three other agents introduced themselves using the same name, which was neither Jeeves nor Jack; for each of at least two agents, exactly two other agents introduced themselves using the same name, which was not Jack.
- iii. one of the agents, say Agent X, introduced himself as Joss to one of the agents who did not use the name Joss. Agent X introduced himself as Jeeves to a certain agent, say Agent Y, and Agent Y introduced himself as Joss to Agent X.
- iv. the agent who did not use the name Julian introduced himself as Jack and Jeeves to the two agents who did not use the name Joss. Among these two agents, the former introduced himself as Julian to the agent who did not use the name James.

Q6. DIRECTIONS *for questions 6 to 10:* Select the correct alternative from the given choices.

The agent who did not use the name Julian would have introduced himself using which name to the agent who did not use the name James?

- ☐ a) **Joss**
- ☐ b) **James**
- ☐ c) **Jack**
- ☐ d) **Either Joss or James**

Q7. DIRECTIONS *for questions 6 to 10:* Select the correct alternative from the given choices.

Which of the following represents the pair of names that the two agents who did not use the name Joss use for introducing themselves to each other?

- ☐ a) **Jack, Jeeves**
- ☐ b) **Jack, Julian**
- ☐ c) **James, Julian**
- ☐ d) **Julian, Jeeves**

Q8. DIRECTIONS *for questions 6 to 10:* Select the correct alternative from the given choices.

Which of the following names is used by the three agents who used the same name to introduce themselves to one of the agents?

- ☐ a) **James**
- ☐ b) **Joss**
- ☐ c) **Julian**
- ☐ d) **Either Joss or Julian**

Q9. DIRECTIONS *for questions 6 to 10:* Select the correct alternative from the given choices.

If Jeff is the actual name of the agent who introduced himself as Joss to the agent who did not use the name Jeeves, then Jeff introduced himself using which of the following pairs of names to the two agents who did not use the name Joss?

- ☐ a) **Julian, Jeeves**
- ☐ b) **Jack, Jeeves**
- ☐ c) **Jack, Julian**
- ☐ d) **James, Julian**

Q10. DIRECTIONS *for questions 6 to 10:* Select the correct alternative from the given choices.

If Jerome is the actual name of the agent who introduced himself as Joss to one of the agents who did not use the name Joss, then Jerome introduced himself using which name to the agent who did not use the name Julian?

- ☐ a) **James**
- ☐ b) **Jack**
- ☐ c) **Julian**
- ☐ d) **Jeeves**

DIRECTIONS for questions 11 to 15: Answer these questions on the basis of the information given below.

A certain number of chairs were placed along a line from left to right all facing the same direction. A group of persons sat on these chairs in the following manner:

- The first person sat in any chair at random.
- The second person sat in any chair which was two places away from the chair in which the first person sat.
- The third person sat in any chair which was three places away from the chair in which the second person sat and so on.

Q11. DIRECTIONS for question 11: Select the correct alternative from the given choices.

What is the minimum number of empty chairs if ten persons sat in the chairs?

- ☐ a) 1
- ☐ b) 30
- ☐ c) 45
- ☐ d) 55

Q12. DIRECTIONS *for question 12:* Type in your answer in the input box provided below the question.

If the fourth person and the fifth person to sit were both to the right of the first person to sit, what is the minimum number of chairs required for eleven persons to sit?

Q13. DIRECTIONS *for questions 13 and 14:* Select the correct alternative from the given choices.

Five persons sat in the chairs such that the chairs at the extreme ends were occupied. Which of the following cannot be the total number of chairs that were unoccupied?

- ☐ a) 2
- ☐ b) 5
- ☐ c) 8
- ☐ d) None of the above

Q14. DIRECTIONS *for questions 13 and 14:* Select the correct alternative from the given choices.

If the chairs were numbered consecutively starting from 1, from left to right, and the seventh person sat in the chair numbered seven, what is the minimum number of chairs required for nine persons to sit?

☐ a) 16

☐ b) 15

☐ c) 25

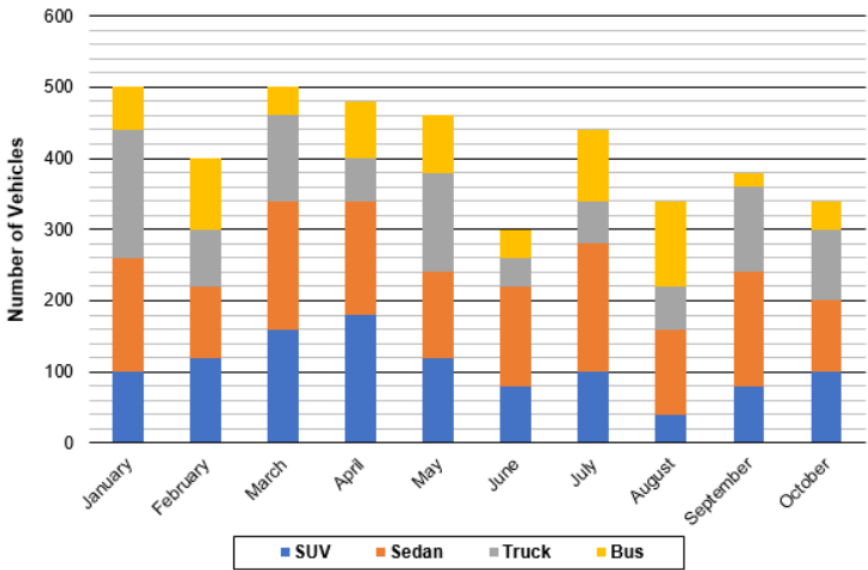

☐ d) 26

Q15. DIRECTIONS *for question 15:* Type in your answer in the input box provided below the question.

If the chairs were numbered consecutively starting from 1, from left to right, and the third person sat in the chair numbered three, what is the minimum possible number of the chair in which the ninth person can sit?

DIRECTIONS for questions 16 to 20: Answer these questions on the basis of the information given below.

An automobile company sells four types of vehicles – SUVs, Sedans, Trucks and Buses. In any month, exactly 40% of the SUVs, 30% of the Sedans, 25% of the Trucks and 10% of the buses were sold at a discount. The following bar graph provides the number of vehicles of each type sold in each month from January to October of a particular year:

Q16. DIRECTIONS for question 16: Type in your answer in the input box provided below the question.

What is the difference between the total number of SUVs sold and the total number of Sedans sold during the given period?

Q17. DIRECTIONS *for question 17:* Select the correct alternative from the given choices.

In how many months were the number of SUVs sold at a discount greater than the total number of Buses sold?

☒ a) 2 ✓ **Your answer is correct**

☐ b) 3

☐ c) 1

☐ d) 4

Q18. DIRECTIONS *for question 18:* Type in your answer in the input box provided below the question.

What is the total number of vehicles sold at a discount in the months of January, February and July?

Q19. DIRECTIONS *for question 19:* Select the correct alternative from the given choices.

During the given period, approximately what percentage of the vehicles (irrespective of its type) were sold at a discount?

☐ a) 27.73%

☐ b) 28.86%

☒ c) 28.16% ✓ **Your answer is correct**

☐ d) 27.54%

Q20. DIRECTIONS *for question 20:* Type in your answer in the input box provided below the question.

In how many months were less than 100 vehicles sold at a discount?
